3) <input type="checkbox"/> Information Disclosure Statement(s) (PTO-1449) Paper No(s) _____ .		6) <input type="checkbox"/> Other: _____ .	

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-2, 4-12 and 14-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Plantz et al. (U. S. 6,088,702) in view of Hager et al. (U. S. 5,377,355) and Price et al. ("Peering Into Peer Review "; (Publication)).

Plantz et al. teach a method and system for permitting coordinated publishing, assembly and administration of texts by an unlimited number of authors or editors, comprising:

As per claims 1-2, 11-12 and 20-22,

- receiving manuscript data defining a manuscript comprising at least one of text data, audio data, and video data (column 7, lines 37-43, 58-63; column 8, lines 20-27; column 9, lines 24-31);

- prompting a potential reviewer for agreement to review said manuscript (column 8, lines 20-30);

- storing agreement data received from said potential reviewer (column 8, lines 20-30, 59-67; column 10, lines 1-13).

- transmitting a signal prompting an additional potential reviewer for agreement to review said manuscript based on stored agreement data from at least one potential reviewer (column 8, lines 59-67).

Plantz et al. does not specifically teach for storing a decision whether to publish, and transmitting said signal if said potential reviewer disagrees to review said manuscript.

Hager et al. teach a method and system for automatically initiating additional procedures with regard to a document, wherein evaluators vote to publish the document, and a decision whether to publish is stored (Abstract; column 2, lines 39-53; column 7, lines 20-21; column 7, line 48 through column 8, line 1; column 8, lines 44-51; column 9, lines 48-57).

Publication, which appears to be published on December 1995, discloses a current practice of reviewing manuscripts in science journals, wherein reviewers may decline the offer to review a manuscript (see pages 1 and 2).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Plantz et al. to include that the decision whether to publish can be stored, and transmitting said signal if said potential reviewer disagrees to review said manuscript, because it would enhance the performance of the system thereby making it more attractive to customers.

As per claims 4-5 and 14-15, Plantz et al. teach said method and system, comprising:

- storing data indicating an identification of an associate editor for said manuscript in association with said manuscript data (column 10, lines 8-36);

- storing at least one date on which said associate editor assigns a potential reviewer (column 10, lines 12-14).

As per claims 6 and 16, Plantz et al. teach said method and system, comprising:

- storing a date on which at least one of receiving said manuscript, prompting a potential reviewer, and receiving agreement data occurs (column 10, lines 12-14, 46-62).

As per claims 7-8 and 17-18, Plantz et al. teach said method and system, comprising:

- authorizing transmission of said manuscript to at least one of associate editors, potential reviewers and reviewers of said manuscript (column 10, lines 46-62).

As per claims 9-10 and 19, Plantz et al. teach said method and system, wherein said authorizing transmission comprises storing, in association with said unique identification, an identification of an associate editor and a reviewer (column 10, lines 30-62).

As per claim 23, Plantz et al. and Publication teach tracking said manuscript and storing said tracking information in a database (column 6, line 66 through column 7, line 2; column 11, lines 14-21, 31-33).

Hager et al. teach said method and system wherein it is determined whether evaluator votes have been received with regard to a particular document, and a prompting message may be utilized to induce an evaluator to submit a vote for the

Art Unit: 3629

document if the evaluator has not done so within a preselected period of time (column 9, lines 27-37).

As per claim 24, Hager et al. teach said method and system wherein said final decision for publishing is made by a majority tallying of the individual reviews, if all reviewers indicate said manuscript should be published, said manuscript is automatically sent to a printing queue or printing facility (Abstract; column 2, lines 39-53; column 7, lines 20-21; column 7, line 48 through column 8, line 1; column 8, lines 44-51; column 9, lines 48-57).

**THIS ACTION IS NOT MADE FINAL.** A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure (see form PTO-892).

Any inquiry concerning this communication should be directed to Igor Borissov at telephone number (703) 305-4649.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Receptionist whose telephone number is (703) 308-1113.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's Supervisor, John Weiss, can be reached at (703) 308- 2702.

Any response to this action should be mailed to:

***Commissioner of Patents and Trademarks***

Application/Control Number: 09/513,960  
Art Unit: 3629
